### A R T I C L E I N F O

**Article history:**  
Received 30 March 2021  
Received in revised form  
3 May 2021

### A B S T R A C T

**Background:** Becoming and staying competent in clinical microbiology and infectious diseases because of dramatic increases in medical knowledge, discovery of new pathogens, emerging infections, new resistance mechanisms and laboratory techniques. E-learning is an effective way of meeting educational needs by providing more efficient and flexible training. E-learning resources have

# Plans for the future

- How is e-learning used in CM education in Europe?
  - National or local level
- What are the available structured training modules/programs?
  - To share these sources/links on our web page
- Creating E-learning tools compatible with European core curriculum (free-access)
